Universal Remote

RM pro+

Add Device

- Make sure the device is in configuration mode.
- Power on the device. If it is in first time use, it will be in smart configuration mode automatically, otherwise you may need to reset it.
- When the device is in smart configuration mode, follow the wizard in App to add device, name it and assign it to a room.
- If you have difficulties adding device in smart configuration mode, please refer to instructions in App to try AP configuration.
- In device page, tap "Add remote" and follow the wizard to add a virtual remote for your IR hub.
- If any button is not functional, please select "Learn button" from menu in remote panel and tap the button to start learning until the button is tested working.

Overview

Unit: mm

Indications

<table>
<thead>
<tr>

</tr>
<tr>
<td>Flashes from quick to slow then off</td>
<td>Device is being configured and then added to network.</td>
</tr>
<tr>
<td>Flash once</td>
<td>flash is off.</td>
</tr>
</tbody>
</table>

Reset for Smart Configuration

- Press and hold the reset (on/off) button using a needle for 6s until the LED flashes quickly.

Reset for AP Configuration

- Only when the LED flashes quickly, press and hold the reset (on/off) button using a needle for another 6s to let the LED flashes quickly and off alternatively.

Prepare App

- Download "BroadLink" App from the App Store or Google Play by searching or scanning the QR code.
- Open the App, sign up an account and follow the wizard to set your home for first use.

NOTE:
- Make sure your phone is connected to 2.4GHz WiFi network before adding device (5GHz is not supported).
- The Wi-Fi password should contain no more than 32 characters and no special characters which are not available on standard keyboard layout.
