**Indications**

- **Status**: Indication
- **Flashes intermittently (repeat flashing 4 times and off)**
  - Device is in AP Setup mode (waiting to be added).
- **Flashes quickly (continuously flash 5 times / set)**
  - Device is in Smart Setup mode (waiting to be added).
- **Flashes slowly then always on**
  - Device is being set up and added to network.

**Troubleshooting**

1. I can’t add the device in API. I don’t know what is the problem?
   - Make sure your Wi-Fi network is active and password contains no more than 32 non-special characters. Make sure the device is in either AP Setup Mode or Smart Setup mode before proceeding on API.
2. I can’t find the device in Alexa and Google Home API. How can I do this?
   - Make sure the device is on the same network as your Alexa or Google Home device. Make sure the device is in the Smart Setup mode.

**Important notices**

- For indoor use only. Dry environment only.
- Use proper furniture only.
- This device is not designed for use with emergency exits.
- This device may not work with standard (non-dimmable) dimmers.
